RE: WSBC Response to Western Sydney Rail Needs Scoping Study

Dear Jennifer,

In response to your invitation to Western Sydney Business Connection (WSBC) to make a submission in relation to the Western Sydney Rail Needs Scoping Study, WSBC partnered with the NSW Chamber of Commerce on a joint survey.

180 responses were received from businesses across Western Sydney. The results of the survey are attached and a brief analysis is outlined below.

You will note that 98% of respondents would like to see the Western Sydney Airport (WSA) rail ready when it opens. Our research backs up the anecdotal evidence that the Western Sydney Business Community sees a rail ready airport as the only acceptable outcome. Many have expressed concern about the additional pressure that any incremental traffic will place on surrounding infrastructure already at capacity.

Many businesses in the area have also expressed the need for a transport option that achieves shorter travel time from their place of business or residence to the new airport than can be achieved to the existing airport. This would facilitate easier corporate travel to the area.

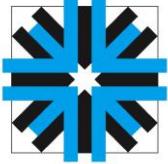

The majority public sentiment to date appears to support an East West high speed rail link. The WSBC and NSW Business Chamber survey results echo this sentiment with almost half of respondents preferring a direct high speed rail route linking the WSA to Parramatta and the Sydney CBD.

Following the high speed rail connection to Parramatta the majority of the remaining respondents are fairly evenly spread between preferring a link to the Northwest Metro at Rouse Hill and a North South link connecting St Mary's and Macarthur. This finding raises the question as to whether an opportunity exists to combine these options into a Rouse Hill - St Marys - WSA – Macarthur option.

Based on the survey results, WSBC recommends both an East West high speed rail link from WSA to Parramatta CBD and a North South rail link, noting the East West high speed rail link as the priority.

Further to the findings that relate to the Western Sydney rail options. 42% of the WSBC community expressed a desire to remain involved with the project moving forward. Of that over 31% are particularly interested in the Western Sydney Rail project and have indicated a desire to be as

involved as possible. WSBC urges TfNSW to continue a dialogue with WSBC and our members throughout the project.

WSBC is an independent, not-for-profit, member based organisation representing thousands of businesses in Western Sydney. Our community comprises mid to large sized companies from across the Greater Western Sydney region and includes representatives from across Local and State Government and private sector.

We trust you find the survey results helpful and look forward to a continuing dialogue.

Best of luck with the project.

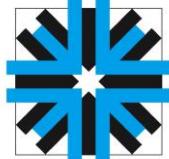

Kind regards

Kind regards
